

Journal Decorating Paper Tea Staining

Instructables.com for image

- Boil water in a large pan then steep 6-8 black tea bags for 5 minutes. You can use loose leaf tea but it does not work as well.
- Use the tea bags and start dabbing your paper.
- Make sure to not leave any area white on the paper.
- Dye the paper the color you want, there can be darker or lighter areas on the paper, just make sure there are no white areas left.
- Let the paper dry **completely**.
- Then write on the paper as you would normally.
